## Controlling Access to Members of a Class

Access level modifiers determine whether other classes can use a particular field or invoke a particular method. There are two levels of access control:

**At the top level:** public, or package-private (no explicit modifier).

**At the member level :**public, private, protected, or package-private (no explicit modifier).

### Access Levels

Modifier	Class	Package	Subclass	World
Public	Y	Y	Y	Y
Protected	Y	Y	Y	N
No-Modifier	Y	Y	N	N
Private	Y	N	N	N
